01

PROBLEM STATEMENT

WHY?

Businesses want to scale quickly but lack the budget to hire full-time employees.

They struggle with finding and paying contractors efficiently, leading to delays in execution.

VALUE FOR PAYMANAI

VALUE FOR PAYMAN AI

Impact Area	Value
Adoption	New B2B use case for PaymanAI
Stickiness	Repeated, high-frequency use
Expansion	Room to integrate Payman's agents

Strengths

- Covers the full contract lifecycle (create → assign → submit → pay).
- Seamless payee creation and direct payments via Payman AI SDK.
- Minimal setup, simple UI, no dev overhead for businesses.

Opportunities

- Leverage international payout rails as they roll out.
- Offer paid features for enhanced analytics, escrow, automation.

Weaknesses

- Payee creation still requires business interaction (automated later).
- No deep reporting or summaries yet.

Threats

- Any PaymanAI API issues could affect critical payment flows.
 - Tools like Deel, Upwork, or Toptal may offer similar experiences.
-

06

VISION

VISION

- A layer that matches contracts with contractors based on their skills and only shows relevant contracts.
- Send notifications as well.
- Are multiple contractors allowed on a single contract?
- Show past payments to the business.
- Analytics?
